

# Willow Class Summer Term Come outside

Go on a minibeast hunt in your garden. What different creatures can you find?

Write a riddle about a sea creature. Can your family guess what it is?

Take a walk at the beach. How many different types of shells can you find?

Visit the library and find some books about sea creatures. Can you learn something new?

Create a poster about what plants need to grow.

Grow your own sunflower. Take photos to share. Will yours be the tallest?!

Design and make a sea creature using recycled materials.

Help to make a meal using vegetables. Maybe a soup, salad or a stew?

Make your own bug hotel (see instructions on next page)

Dig deep and complete your jigsaw with courage, compassion and creativity.

## Simple Bug Hotel – Materials:

- A large plastic bottle cut into two cylinders,
- sticks,
- pine cones,
- bark
- String or garden twine
- Anything else you can find – bamboo with its holes is great too!

## Instructions

- 1) We cut our bottle down to shape (please can the adult do this)
- 2) We collected what materials we could find and arranged by size and texture – we snapped our twigs to make them a little smaller. Had larger and bigger ones. Arranged pinecones.

- 3) If you plan to hang your bug hotel, loop some garden twine round and then start layering your bug hotel. We did one hotel for on the ground and one for hanging from a tree to see if it would attract different creatures.
- 4) Stuff it to make it nice and firm, so it doesn't get blown about!
